

A Success Story from **McCormick Rankin Corporation** in Kitchener, ON

Asif Quader emigrated from Bangladesh. After completing his Master's degree at A&T State University in Environmental Engineering, Asif came to Canada in 2002. He completed his Ph.D. at McMaster University where his primary research focus was on channel-forming discharge used in stream restoration projects. Asif became a Canadian in 2006.

He joined the Water Resources group at MRC in October 2007, shortly after graduation. He has a very strong technical and academic background, is an excellent communicator and is known to be very meticulous. With his technical and academic knowledge, Asif has become an asset to the company. He has become a mentor to the junior staff in the group. He obtained his Professional Engineer status in March 2009.
