

A Success Story from **Region of Waterloo** in Kitchener, ON

“Hanan Wahib was hired in 2002 as a Transportation Planner. At that time, she had her Engineering qualification from Syria with experience in bridges, roads and waterways. We found her to be very inquisitive with a strong desire to learn and grow in her engineering role. She also worked hard on improving her English language skills.

She proved herself so helpful to us at the Region that within a few years she moved into a contract role as Transportation Planning Engineer and was later hired on full-time. Her role currently involves project management in transportation studies and coordination with consultants and lawyers and other agencies. Hanan has made lot of friends within the Region and has integrated very well within the organization. Working with Hanan has been a positive and rewarding experience.”
