

A Success Story from **Safety Kleen Canada Inc** in Breslau, ON

Jwalant Kumar Patak joined us a year ago. One of the reasons we hired him was that he had the necessary “operating engineering certificate” issued by Technical Standards and Safety Authority and also had extensive petrochemical manufacturing experience as well. He fit right into the organization, he learned very quickly and was extremely eager to spend lots of time looking at process drawings for the facility, understanding them and learning it. We are now in a position to offer a promotion to him.

Michael Puersten,
Refinery Manager
Safety Kleen Canada Inc.
